To Whom It May Concern,

I am pleased to write this letter of recommendation for Karen Díaz Gutiérrez, who has consistently demonstrated exceptional commitment and dedication in her role as Associate Project Engineer at Aspentech de Mexico.

Karen has been instrumental in designing and delivering control systems, integrating and testing hardware and software requirements, and leading both internal and customer-facing testing events. Her ability to troubleshoot and deploy timely resolutions has significantly contributed to the success of our projects.

She has shown outstanding skills in defining project requirements, providing system and application design, and customizing configurations based on customer needs. Her support during system installation and maintenance has been invaluable, and she has also contributed to the development of training materials and documentation.

Karen's professionalism, technical expertise, and unwavering dedication make her a valuable asset to any team. I highly recommend her for any opportunity that allows her to continue growing and contributing with her talents.

Sincerely,

Javier Roblero
Senior Manager Project Engineering
